SMART CONTROL BOX

Remote control and automation for your site

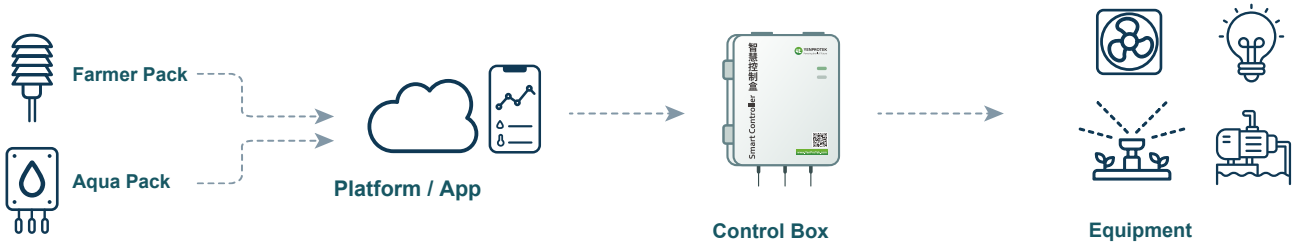

Control field equipment from your phone

- Switch equipment on and off remotely
- Schedule operating hours
- Automate operation based on site conditions

Turn sensor data into automatic actions

Designed and Made in Taiwan

www.yenprotek.com

From farms to warehouses, simplify everyday operations.

Run irrigation, fans and aerators without frequent site visits.

FIELDS & ORCHARDS

Irrigation and sprinklers

GREENHOUSES

Fans, misting, vents, grow lights

AQUACULTURE

Aerators, paddlewheels, feeders

LIVESTOCK FACILITIES

Ventilation, cooling pads, heating

GARDENS & LANDSCAPES

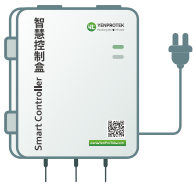

Sprinklers and lighting

WAREHOUSES

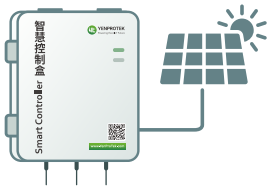

Dehumidifiers, humidifiers, HVAC

Choose a model for your power source

AC-POWERED

Choose this model when AC power is available.

SOLAR-POWERED

Solar-powered for sites without easy grid access.

HOW TO CHOOSE	AC-POWERED	SOLAR-POWERED
Site conditions	AC power available	No grid access / difficult wiring
Box power supply	On-site AC power	Solar panel + lithium battery
Best for	Powered sites: warehouses, greenhouses	Remote farmland and outdoor sites

* The control box only switches power ON/OFF. High-power or three-phase motors (e.g., aerators, paddlewheels and pumps) require external wiring by a qualified electrician.
Confirm the power requirements of the box and connected equipment separately for each site.
